Objective

I am seeking a Software Developer opportunity (Junior or Internship), focusing on Full-Stack or Front-end, to apply my knowledge in creating robust solutions and contribute to challenging projects.

Professional Profile

Creative Full-Stack Developer and Computer Science student at Fatec. I combine solid knowledge in Back-end (C#, Node.js, PHP) and Front-end (React, TS) with a keen eye for design and UX (Photoshop, Blender). I am proactive, collaborative, and focused on transforming complex challenges into efficient and intuitive software solutions.

Academic Background

Fatec Itaquera - SP

Technologist in Multiplatform Software Development

Expected Conclusion: Dec/2026

Languages:

English: Advanced (Currently studying - Wizard)

Portuguese: Native

Professional Experience

Back-end Developer – Faculdade de Tecnologia de Itaquera - FATEC Itaquera

Internal internship provided by the college itself to gain work experience and assist in the institution's development.

Developed and maintained RESTful APIs in PHP and MySQL for managing academic events and extension courses on the institution's portal, implemented *endpoints* for new functionalities, improving the flow of course registration and viewing, and used Postman for testing, validation, and documentation of API routes, ensuring data integrity.

Technologies: PHP, MySQL, Postman

Sep 2024 - Dec 2024

Projects

Personal Portfolio

- Website developed with React, designed for both Desktop and Android experience.
- Other smaller projects are available for viewing within the portfolio.

<https://www.linkedin.com/in/luc45-bs/>

React Native Game Store

- Interdisciplinary project for the fifth semester of the Multiplatform Software Development college. Project where I worked on the Frontend, with React Native. I also worked using the IGDB API for easy access to game data.

Technologies: React Native, JavaScript, CSS

<https://github.com/TheAwesomeCake/Game-Vault>

API: <https://github.com/TheAwesomeCake/igdb-test>

Simple RPG in Unity

- Game developed in Unity, where you can explore a small map, interact, and face enemies in turn-based battles. It was a personal project to develop my game development skills.

Technologies: Unity, C#

<https://github.com/TheAwesomeCake/Unity-RPG>

The project can be tested in my portfolio at: <https://luc45bs-portfolio.vercel.app/>

Skills

Hard Skills:

Front-End: JavaScript, TypeScript, React, HTML5, CSS3

Back-End: Node.js, PHP, C#

Databases: MongoDB, SQL (MySQL)

Data Analysis: Power BI

Game Dev: Unity, Blender

Design: Photoshop, Figma

Other Tools: Git, Postman

Soft Skills:

- Teamwork: Ability to collaborate with other developers and designers to achieve common goals.
- Problem Solving: Focus on analyzing complex challenges, identifying causes, and implementing efficient and robust solutions.
- Proactivity: Initiative to anticipate problems, seek continuous improvement, and learn new technologies.

Other:

- Photoshop Skills: Knowledge of image editing, asset creation, and layout manipulation for web projects.
