Objective

A student of **Multiplatform Software Development** at Fatec Itaquera and a **Full-Stack Developer**, I combine solid knowledge in **Back-end (C#, Node.js, PHP)** and **Front-end (React, TypeScript)**. I am seeking an opportunity as a **Software Developer** (Junior or Internship) to apply my proactivity and technical vision in creating robust solutions, transforming complex challenges into efficient software.

Education

Fatec Itaquera - SP

Technologist in Multiplatform Software Development

Jan/2023 – Present

Professional Experience

Back-end Developer – Faculdade de Tecnologia de Itaquera - FATEC Itaquera

Internal internship provided by the university to gain work experience and assist in the institution's development.

Developed and maintained **RESTful APIs** in **PHP** and **MySQL** for managing academic events and extension courses on the institution's portal, ensured integrity for new functionalities, improving the course registration and viewing flow, and used **Postman** for testing, validation, and documentation of API routes, ensuring data integrity.

Technologies: PHP, MySQL, Postman

Sep 2024 - Dec 2024

Courses and Certifications

Alura - Power BI: Performing ETL in Power Query

Alura - Python for Data Science

Test of English for International Communication (TOEIC) – Score 625

Skills

Data Analysis: SQL (MySQL), Power BI (DAX/Power Query), Excel (Pivot Tables/Vlookup), Data Modeling.

Back-End & Databases: PHP, C#, MongoDB, API Integration (REST), Spring Boot.

Other Tools: Git, Postman (Data Collection and Validation), Microsoft Office.

Languages:

English: Intermediate (TOEIC Certification)

Portuguese: Native

Relevant Projects

Game Store "Game Vault" (Data Extraction)

- Data collection and processing automation (ETL) of thousands of games via REST API (IGDB), ensuring data structuring and automatic updates.

Technologies: React Native, API Integration, JSON.
